Docket No. 50-285

APPLICATION FOR AMENDMENT
OF
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U. S. Nuclear Regulatory Commission ("the Commission"), Omaha Public Power District, holder of Facility Operating License No. DPR-40, herewith requests that the Technical Specifications set forth in Appendix A to that License be amended as attached.

The proposed changes in Technical Specifications are provided in Attachment A to this Application. The proposed changes do not affect the Discussion, Justification and No Significant Hazards Consideration Analysis, which demonstrates that the proposed changes do not involve significant hazards considerations, previously transmitted in the Application for Amendment dated June 5, 1992 (LIC-92-017A). The proposed changes in specifications would not authorize any change in the types or any increase in the amounts of effluents, or a change in the authorized power level of the facility.

WHEREFORE, Applicant respectfully requests that Specification 2.10.2(7) of Appendix A to Facility Operating License No. DPR-40 be amended in the form attached hereto as Attachment A.

-2-

A copy of this Application, including its attachments, has been submitted to the Director - Nebraska State Division of Radiological Health, as required by 10 CFR 50.91.
