Supplement to Technical
Specification Change Request:
Relocation of Component Lists

The subject component lists are to be relocated to PNPP's Operations Manual and made subject to the change control provisions for procedures as described in the Administrative Controls Section of PNPP's Technical Specifications.

In order to accomplish the relocation of the subject component lists, the June 19, 1992 Amendment Request also proposed the modification of several additional Specifications which contained specific references to the Table numbers of the component lists that are being relocated.

This Supplement identifies two additional modifications to PNPP's Technical Specifications to remove additional references to the Table numbers of the component lists that are being relocated. Attachment 1 contains a description of the proposed changes. Copies of the marked up Technical Specification pages are provided in Attachment 2. The Safety Assessment, and the Significant
