Division of Reactor Safety and Projects

Subject: Time Extension For Report - DER 84-28
A 50.55(e) Potentially Reportable Deficiency Relating To
Diesel Generator Fuel Lines In Unit 3.
File: 84-019-026; D.4.33.2

Reference: (A) Telephone conversation between P. Narbut and T. Bradish on
May 11, 1984
(B) ANPP-29696, dated June 7, 1984 (Interim Report)
(C) ANPP-30447, dated September 6, 1984 (Time Extension)

Dear Sir:

The NRC was notified of a potentially reportable deficiency in
Reference (A), an Interim Report was transmitted by Reference (B), and a
Time Extension was requested by Reference (C). At that time, it was
estimated that a Final Report would be available by October 19, 1984.

Due to the extensive investigation and evaluation required, it is now
expected that this information will be finalized by December 14, 1984, at
which time a complete report will be submitted.

There is no new information or change to the Interim Report at this time.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President
Nuclear Production
ANPP Project Director
