

STATEMENT

PLACE 

DATE: 5-9-83

I, Dean Arthur Fellingner, hereby make the following voluntary statement to H. Brooks GRIFFIN who has identified himself to me as an Investigator with the U. S. Nuclear Regulatory Commission. I make this statement freely with no threats or promises of reward having been made to me.

My name is Dean Fellingner, and from October 1974 until March 1979, I worked as a civil engineer for Gibbs & Hill, the design engineer at Comanche Peak. I am presently a construction project manager for Dravo Constructors, Inc., a subsidiary of Dravo Corporation. Gibbs and Hill is also a subsidiary of Dravo Corporation.

During approximately the last six months that I worked at Comanche Peak, I was responsible for evaluating construction requests to cut through rebar. ~~Q~~ The criteria for such evaluations were based on design parameters determined by Gibbs & Hill at the home office in New York. When requests to cut rebar were forwarded to me, I compared the locations to be cut with locations of previous cuts, and if my evaluation determined that the rebar could be cut within the criteria established by Gibbs & Hill engineers, I prepared a Component Modification Card ^(cont) authorizing the cut.

I remember that Robert Mosserly was the foreman over the crew that drilled the holes through the rebar. Although requests to cut rebar

crew a number of times. I never saw
Reed. I never saw the CMC to know because his
crew did the drilling.

During the time that I worked at Comanche Peak
I do not know of any rebar cut without
prior engineering approval and documentation.
To my knowledge, all rebar cut while I was
at Comanche Peak was done after permission
was received in the form of a Component
Modification Card.

I have read the foregoing statement consisting of 2 handwritten/
~~typed~~ pages. I have made and initialed any necessary corrections and
have signed my name in ink in the margin of each page. I swear that the
foregoing statement is true and correct. Signed on 5-9-83 at 2:38 PM
