United States Nuclear Regulatory Commission  
Washington, DC 20555

ATTENTION: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation

SUBJECT: Beaver Valley Power Station - Unit No. 2  
Docket No. 50-412  
Backfit Status

Gentlemen:

The attached sheets reflect the current status of the Beaver Valley Power Station Unit No. 2 backfit issues.

Duquesne Light Company (DLC) backfit sheets parallel the status requirements of Paragraph V of the Licensing Backfit Procedure (Enclosure 2 of GNL 84-08) except that they do not include the scheduled completion date for each milestone.

For several of the issues, the last character(s) of the ID numbers in the first column (i.e., L-84-XX) are blank. When the Division of Licensing Plant Specific Backfitting Tracking System reflects those numbers, DLC plans to use the same numbers for internal tracking.

The remarks in the last column of the status sheets reflect only the highlights of the status. These remarks do not necessarily correspond to the more detailed information supplied in the backfit identification letters referenced in column 2. It should also be noted, that these remarks do not reflect all of the facets of the DLC position which would be submitted at a later date if these issues require appeals.
