

Docket No. 50-346  
License No. NPF-3  
Serial No. 1125  
February 13, 1985

RICHARD P. CROUSE  
Vice President  
Nuclear  
(419) 259-5221

Director of Nuclear Reactor Regulation  
Attention: Mr. John F. Stolz  
Operating Reactor Branch No. 4  
Division of Licensing  
United States Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Figure 2.1-2, 2.2-1, Table 3.2-1 and Bases.

The attachment identifies the proposed change and its safety evaluation and a significant hazard consideration. The proposed change concerns a revision to the minimum Reactor Coolant System flow requirement to take credit for decrease in the core bypass flow as a result of using Lump Burnable Poison rods in Cycle 5 design.

Enclosed is a check for \$150 as required by 10CFR170.12(C) for license application.

Very truly yours,

RPC:GAB
