SUBJECT: Limerick Generating Station, Units 1 and 2
Technical Specifications Change Request No. 94-02-0
Hydrogen and Oxygen Calibration Gas Concentrations

Gentlemen:

By letter dated March 1, 1995, PECO Energy Company submitted Technical Specifications Change Request (TSCR) No. 94-02-0 to clarify the concentrations of calibration gas required to calibrate the Hydrogen and Oxygen Analyzers, in support of the requirements of LGS Transient Response Implementation Plan (TRIP) T-102, "Primary Containment Control Bases." In the March 1, 1995 submittal we requested that TSCR No. 94-02-0 become effective within 30 days of issuance.

PECO Energy Company hereby requests that, if approved, TSCR No. 94-02-0 for Limerick Generating Station, Units 1 and 2, be issued prior to April 25, 1996 and become effective within 45 days of issuance. This revised implementation schedule will support recalibration of the affected equipment.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

G. A. Hunger, Jr.
Director - Licensing
