John A. Zehner, R.Ph.
Radiation Safety Officer
NukeMed Inc., dba Spectron Rx
17490 Dugdale Dr.
South Bend, IN 46635

SUBJECT: AMENDMENT NO. 07 TO RADIOACTIVE MATERIALS LICENSE FOR NUKEMED
INC. DBA SPECTRON RX, NRC LICENSE NO. 13-32726-01MD

Dear Mr. Zehner:

Enclosed is Amendment No. 07 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 13-32726-01MD in accordance with NukeMed Inc., dba Spectron Rx's (your) February 10, 2020 request. Your request is available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession No. ML20049A059. The NRC's ADAMS is accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

Please note that, in accordance with license Condition No. 24.R., responses to our request for information – regarding your radioiodine ventilation system, bioassay program, and air sampling program, as well as for your actinium-225 safety program – are still needed from you. Our April 11, 2020 request for information letter and your April 14, 2020 letter confirming that you would provide requested information are available from NRC's ADAMS at Accession Nos. ML20105A435 and ML20105A439, respectively. If you are unable to provide the requested additional information by May 11, 2020, as indicated in your letter, please provide an update to our office as to the status of your response to me via phone at 630-829-9892 or via email at sara.forster@nrc.gov.

Please review the enclosed document carefully, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III Office at 630-829-9887, so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from NRC's ADAMS.

Sincerely,

Sara A. Forster, M.S.
Health Physicist
Materials Licensing Branch

Docket No. 030-38044
License No. 13-32726-01MD

Enclosure: Amendment No. 07 to NRC License No. 13-32726-01MD
