PRAIRIE ISLAND NUCLEAR GENERATING PLANT  
Docket Nos. 50-282 License Nos. DPR-42  
50-306 DPR-60

**Withdrawal of License Amendment Request  
Regarding the Incorporation of L\* Steam Generator Tube Repair Criteria**

By letter dated January 9, 1995, we submitted an application for amendment to the Prairie Island Technical Specifications. That license amendment request proposed changes to Technical Specification 4.12, "Steam Generator Tube Surveillance", to incorporate revised acceptance criteria for steam generator tubes with degradation in the tubesheet roll expansion region. Those criteria for steam generator tube acceptance are known as F-Star and L-Star. The F-Star portion of this license amendment request was approved by the NRC on May 15, 1995. At this time, we wish to withdraw the remaining L-Star portion of this license amendment request.

We have made no new Nuclear Regulatory Commitments in this letter. Please contact Gene Eckholt (612-388-1121) if you have any questions related to the withdrawal of the L-Star portion of our January 9, 1995 license amendment request.
