Perry Nuclear Power Plant
Docket No. 50-440
Notification of Generic Letter 89-10, "Safety-Related Motor-Operated
Valve Testing and Surveillance," Activities Completion

- References: 1. April 8, 1994, letter from R. A. Stratman to Nuclear
Regulatory Commission, Response to Generic Letter 89-10,
Supplement 6, "Information on Schedule and Grouping, and
Staff Responses to Additional Public Questions"
(PY-CEI/NRR-1776L)
2. September 23, 1994, letter from R. A. Stratman to Nuclear
Regulatory Commission, Amended Response to Generic Letter
89-10, Supplement 6, "Information on Schedule and
Grouping, and Staff Responses to Additional Public
Questions" (PY-CEI/NRR-1849L)

Gentlemen:

In Generic Letter (GL) 89-10, "Safety-Related Motor-Operated Valve
Testing and Surveillance," dated June 28, 1989, the Nuclear Regulatory
Commission (NRC) requires, pursuant to 10CFR50.54(f), that licensees
notify the NRC within 30 days after the design basis reviews, analyses,
verifications, tests, and inspections conducted to comply with the
guidelines of the GL are completed. By the letters referenced above, the
Perry Nuclear Power Plant (PNPP) committed to complete the initial
GL 89-10 Motor-Operated Valve (MOV) testing program by the end of the
fifth refueling outage.

The design basis reviews, analyses, verifications, tests, and inspections
were completed consistent with the commitments related to the
GL 89-10 MOV testing program. These commitments are described in the
PNPP responses to GL 89-10 and its supplements, and in the response to
NRC Inspection Report 92018.
