BASES:

The bases for this Selected License Commitment is stated in reference 1, page 11, "Part of the licensing bases of the RN system included the ability for operators to manually change the discharge path for the RN system from the non-safety related Lake Wylie to the safety related SNSWP."

This Selected License Commitment was developed to address the NRC concerns about actions to be taken in the event instrumentation/alarms were out of service which would impair the ability of Operations to recognize loss of the non-safety discharge. This SLC shall ensure the proper actions are taken based on plant equipment conditions.

BASES:

The bases for this Selected License Commitment is stated in reference 1, page 11, "Part of the licensing bases of the RN system included the ability for operators to manually change the discharge path for the RN system from the non-safety related Lake Wylie to the safety related SNSWP."

This Selected License Commitment was developed to address the NRC concerns about actions to be taken in the event instrumentation/alarms were out of service which would impair the ability of Operations to recognize loss of the non-safety discharge. This SLC shall ensure the proper actions are taken based on plant equipment conditions.
