Mr Harold R. Denton, Director
NRC Office of Nuclear Reactor Regulation
Washington, DC 20555

Dear Mr. Denton,

I am writing to you about
my concerns regarding the low-
power operations of Limerick's Unit 1.
I am aware that in the period
between the fuel loading in
October 1984 and the end of
January 1985 Unit 1 has ex-
perienced 74 "events" ... a su-
ppremacy for operating errors
which of course carry with them
the possibility, however slight,
of a catastrophic accident.

Therefore I call for a revocation
of Lineick's low power license.

And I request that the NRC
send me licensee "event"
reports on Lineick as they
are issued.

Thank you.

Sincerely

Mary Bye
