Office of Nuclear Reactor Regulation
Attn: J. F. Stolz, Chief
Operating Reactor Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Reactor Building Purging Summary Report

Your letter of December 5, 1984, regarding containment purging, requested that GPUN provide a summary report after the first cycle of operation after restart that contains (1) the actual number of hours of purging for each of the operations or combination of operations listed in T.S. 3.6.9, (2) an analysis of the benefits of purging in terms of reduction in radiation exposure to plant personnel, and (3) the actions taken to minimize personnel entries. We agree with your conclusions that our proposed Technical Specification requirements (TSCR 116, Rev. 2) combined with other actions to limit off-site doses are adequate to ensure protection of the public health and safety. Additionally, we shall submit the requested report within 120 days following shutdown for Cycle 6 refueling.

Sincerely,

H. D. Humill
Director, TMI-1
