General Comment

i write to object to any sweeping measures to store irradiated materials in any new manner without comprehensive, thorough public oversight and review. the covid19 scare and protocols is not license to shortcut, bypass or derail the oversight of the most toxic substances on the planet. the fact this is even being considered is incomprehensible and vile. shame on you. these substances must be disposed of in the most careful and meticulous manner possible. always. no matter what. our lives - al lives -depend on it. the health and vitality of our planet and every living thing on it depends on it.
