General Comment

I believe this proposed rule change (NRC-2020-0065-0001) is an incredible breach of the public trust. There's no way we should allow ANY amount of radioactive materials to be disposed of in such a reckless manner. I understand completely the desire to find a solution to the growing stockpile of this hazardous material especially the vast quantity of low-level waste. However, proposing to bury it alongside normal landfill waste is unconscionable and reprehensible. I think continuing to store this material safely and consciously as has been done is the right way. This will continue the pressure on Congress to finally determine and agree on a logical and long-lasting solution for disposal (storage for thousands of years?).
