ADDITIONAL INFORMATION ON
EMERGENCY PLAN REVISION REQUEST

Gentlemen:

On March 6, 1992, Georgia Power Company (GPC) submitted a request to revise Section H of the Plant Hatch Emergency Plan. The intent of the revision was to clarify the description of the Emergency Operating Facility (EOF) ventilation system. Based on subsequent discussions with NRC personnel during late August and early September 1992, GPC is resubmitting the revision request to provide further clarification. The sentence stating the EOF ventilation system is functionally similar to the Technical Support Center (TSC) ventilation system, is being removed to avoid confusion. Although similarities exist between the two systems, there are also differences in components and system operation.

The conclusions stated in the March 6, 1992, letter relative to plant and personnel safety are still valid. The revised page (H-3) and the proposed markup of the change are provided as an enclosure to this letter.

Sincerely,

J. T. Beckham, Jr.

OCV/cr
