Travis and Dallas,

As Travis and I discussed over the phone today, the NRC has granted your request for additional time to respond to the Notice of Violation and Inspection Report 030-39167/2020-001, dated April 1, 2020 (ADAMS Accession No. ML20093A737). Specifically, the NRC has agreed to extend your required response in writing by 30 additional days. The new due date for your response in writing is now **June 1, 2020**.

If you have questions or concerns related to the response or to your licensed activities in general, please do not hesitate to reach out to me.

Jason,

I have attached a letter for an extension request for our response to the Notice of Violation. Please review and get back to me.

Thanks,

Travis Wyatt

Please accept my apologies; there was an undated statement at the end of the Notice of Violation. A corrected copy of the letter and enclosure is attached. Let's go ahead and call this some teething problems from the new telework environment!

An electronic response would be preferred – hard-copy mail actually makes this harder! You can skip the step of sending a hard-copy to Washington, D.C., I'll take care of uploading it to our document system.

Afternoon Jason,

We have received the Notice of Violation and will work on a response. I assume that we are able to submit an electronic response?

Regards,

Travis Wyatt

Subject: Ext: -NRC Inspection - Notice of Violation

Travis (& Dallas),

Please accept my apologies that the Notice of Violation took this long to push out the door, but the Agency has had to rapidly change how we do business in response to the pandemic.

Please find attached the Notice of Violation for the February 4, 2020, NRC inspection, with the two violations that we discussed in our phone call on March 6, 2020. Normally we would mail out a hard copy, but that appears to be one of the activities that has been discontinued in our teleworking environment.

Please note that a response is required within 30 days of the date of the letter (unfortunately the first of April – I dislike issuing anything on the first....), however if you need to delay your response as a result of impacts of the COVID-19 pandemic on yourself personally or on the Element Technical organization, please let me know and we can grant an extension to this time period for 'good cause' (see the language in the enclosed Notice of Violation) – we're trying to be flexible to the current crisis and sensitive to the impacts and burdens we have as an Agency on licensees.
