ULNRC-2713

Gentlemen:

DOCKET NUMBER 50-483

CALLAWAY PLANT

REVISION TO TECHNICAL SPECIFICATION 3/4.6.1.2

CONTAINMENT LEAKAGE

- References: 1) ULNRC-2378, dated March 15, 1991
2) ULNRC-2699, dated September 16, 1992

Reference 1 transmitted an amendment application to revise Technical Specifications 3/4.6.1.1 and 3/4.6.1.2 and a partial exemption request from the testing requirements of 10CFR50, Appendix J.

Reference 2 transmitted a revision to the Bases for Technical Specification 3/4.6.1.2 to add clarification concerning acceptance criteria for the "as found" and "as left" conditions of the containment when performing a Type A test. This additional information was submitted based on conversations with the Staff to clarify our proposed revision to Surveillance Requirement 4.6.1.2b. Upon further discussions with the Staff it was concluded that the Reference 2 transmittal did not contain all of the information necessary for clarifying the acceptance criteria for the "as found" and "as left" conditions of the containment when performing a Type A test.

The purpose of this transmittal is to submit a revised version of the revision to the Bases for Technical Specification 3/4.6.1.2. The conclusions of the complete Safety Evaluation and Significant Hazards Evaluation transmitted by Reference 1 remain valid.

Very truly yours,

040023

Donald F. Schnell
