Docket No: 50-142

Dear Mr. Pate:

Thank you for the Inspection Report No. 50-142/92-01 dated 09/28/92.

By way of this letter, I would like to clarify two items that are mentioned in the Report and inform all on the distribution list of the change of personnel at UCLA.

The last sentence in paragraph 2, part 2, Radiation Protection (83743), of the Report, states that "The licensee was unable to find a burial site that would accept the lead by the cut-off date agreed to in the Agreement."

Actually, the lead was shipped in August, 1989 to Nuclear Sources and Services, Inc. in Texas through U.S. Ecology, Inc. Thus, we did meet the deadline of September 30, 1989 as stated in the Agreement.

This also corrects item (b) of paragraph 6, part 2, Radiation Protection (83743), of the Report, that states "...had been shipped to an approved burial ground for disposal."

The last sentence in item (e) of paragraph 6, part 2, Radiation Protection (83743), of the Report states "An ALARA goal of 8 person-rem had been established for the project." Our contractor's administrative goal was 800 mrem per person for this project as described in the Work Plan. It is expected that no one person will exceed 400 mrem and the person-rem will not exceed our estimate of 2 person-rem which was described in Phase II of the Decommissioning Plan.
