

I-GANE-77

GANE #77

DOCKETED
USNRCMINUTES OF THE NUCLEAR SAFEGUARDS COMMITTEE MEETING OF
June 27, 1991

'96 JUL 18 P12:33

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Members Present: E. F. Cobb, P. Desai, S. Ewald, L. Gucwa,
B. Kahn (Chair), B. Livesay, J. Mahaffey,
H. Neumann, L. Petherick

Others Present: R.A. Karam, Billy Statham

Distributions: (i) Minutes of the committee meeting of
May 9, 1991
(ii) Agenda for the meeting
(iii) Draft Procedures 2601, 2602
(iv) Form A draft from J.C. Powers

The Chair called the meeting to order at 2:05 PM.

1. Minutes of the Committee meeting of May 9, 1991 were approved.
2. (i) R. Karam announced the expiration of terms of several members of the Committee, and handed out certificates of appreciation for their worthy service. The recipients were B. Kahn, H. Neumann and L. Petherick. The Committee decided that E.F. Cobb will be the new chair, J. Mahaffey will continue as vice chair and P.V. Desai will continue as secretary.
- (ii) R. Karam informed the Committee of the interest shown by EG&G, Idaho, to make the NNRC as a major Boron/Neutron Capture Therapy (BNCT) facility. Additionally, EG&G has shown interest in supporting the research and activity at the NNRC of \$500K to one million, provided that Georgia Tech continues to support the functioning of the center. It is anticipated that some changes will be made in the configuration of the facility. It will take anywhere from six months to one year to get NRC approval for such changes. The estimated cost of the changes is about \$500,000.00. It is anticipated that eventually the facility will be used to treat patients also.
- (iii) R. Karam informed the Committee that the NRC had approved a modification to the Organization chart of the NNRC, removing the chair of the Nuclear Safeguards Committee from being the Radiation Safety Officer at Georgia Tech. At Georgia Tech, the Manager, Office of Radiation Safety (MORS) is equivalent to the Radiation Safety Officer.

3. Procedure Approval.

The Committee approved draft procedures 2601 and 2602. The Committee asked for further deliberations before approving the removal of 5000 series procedures.

4. The Committee approved R. Karam's request to irradiate silicon ingots without using an aluminum wrap.

5. The Committee urged B. Livesay and N. Gordon to complete their audits. It was decided that subsequent audits be conducted in a specially called meeting to expedite the process.

6. Form A Approval.

The Committee approved J. C. Powers' request.

7. The Committee approved the Radiation Safety Manual through page 31.

The next meeting of the Committee was scheduled for August 1, 1991 at 1:00 P.M. The meeting was adjourned at 3:27 PM.

Respectfully submitted,

Prateen V. Desai
