Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

ATTN: Document Control Desk

SUBJECT: Quad Cities Station Units 1 and 2
Administrative Corrections to a Proposed Amendment to Facility
Operating License DPR-29 and DPR-30
Appendix A; Technical Specifications
NRC Docket Nos. 50-254 and 50-265

REFERENCES: (1) J.L. Schrage to T.E. Murley letter dated April 20, 1992.
(2) Teleconferences between CECO (J. Schrage) and NRR
(L. Olshan) on October 30, 1992 and November 3, 1992.

Dea: Dr. Murley,

Reference (1) transmitted a proposed Amendment to the Technical Specifications (Appendix A) of Facility Operating Licenses DPR-29 and DPR-30 (Quad Cities Station, Units 1 and 2). During the Reference (2) teleconferences, NRR and CECO discussed several administrative corrections to the affected Technical Specification pages submitted in Reference (1). The affected pages are 3.2/4.2-11 for DPR-29 and 3.2/4.2-8 for DPR-30. Both of these are Bases pages.

On proposed pages 3.2/4.2-11 (DPR-29) and 3.2/4.2-8 (DPR-30), which were submitted in Reference (1), the following statement was added:

"Ammonia, chlorine, and sulphur dioxide detection capability was added to the plant in response to the referenced study. In a report generated by Sargent and Lundy in May, 1988, justification was provided and the chlorine and sulphur dioxide detectors were deleted from the plant."

Based upon the referenced teleconferences, the following administrative changes were identified for this statement on both pages:

- The date "May, 1988" should be changed to "April 1991". This change reflects an updated report, and was correctly identified in Attachment B (Description and Safety Analysis of the Proposed Changes) of Reference (1).
- The clause "...and the chlorine and sulphur dioxide detectors were deleted from the plant." should be changed to "...to delete the chlorine and sulphur dioxide detectors from the plant." This change clarifies the intent and results of the April 1991 Sargent and Lundy report.

November 6, 1992

The proposed page 3.2/4.2-8 for DPR-30 (submitted in Reference (1)) did not include changes which were added as a result of Amendment 130 to DPR-30 (February 21, 1992). These changes resulted in repagination of pages 3.2/4.2-7 and 3.2/4.2-8 due to additional text on page 3.2/4.2-7. In addition, page 3.2/4.2-8 references "SAR Section 6.2.6.3". This reference does not reflect the reformatted and rebaselined Quad Cities Station Updated Final Safety Analysis Report (UFSAR) and should be changed to "UFSAR Section 7.3.1.4". An updated version of page 3.2/4.2-8 (DPR-30) which reflects the changes described above, is attached to this letter.

If there are any question or comments, please direct them to John L. Schrage at 708-515-7283.

Sincerely,

John L. Schrage
Nuclear Licensing Administrator
