Subject: Catawba Nuclear Station  
Dockets 50-413 and 50-414  
Inspection Report 50-413, 414/96-04  
Revised Commitment Completion Date

By letter dated April 26, 1996, the NRC issued an Inspector Follow-Up Item (IFI) as described in Inspection Report 50-413, 414/96-04. By letter dated May 29, 1996, Duke responded to this IFI, indicating certain corrective actions would be taken. These corrective actions constituted commitments to the NRC. One of the corrective actions in Section 4 of the response was that the revised News Group Emergency Plan would continue to be tested and refined during the remaining 1996 Catawba Nuclear Site Emergency Response Organization Quarterly Drills. The quarterly dates listed in the response were 09/01/96, 11/13/96, and 12/04/96. Due to the steam generator replacement outage schedule, the 09/01/96 drill has been rescheduled to occur on 10/02/96; the other dates remain the same. As originally stated in the response, the final implementation of all the corrective actions will be achieved by 03/01/97.

If there are any questions concerning this response, please contact Kay Nicholson at (803) 831-3237.

Sincerely,

W. R. McCollum, Jr.
