Washington, D.C. 20555

Subject: Response to Request for Additional Information Concerning Amendment  
Request and SAR No. 37, Facility License No. R-37, Docket No. 50-20

Dear Sir:

On 13 February 1989, the Massachusetts Institute of Technology requested an amendment to the Facility Operating License which would be a revision in the technical specification governing the fission density limit. This letter is to inform you that we are continuing our analyses in response to your 14 January 1991 request for additional information, and should have these analyses completed by 1 February 1993.

We apologize for the delay. Please contact the undersigned if you should require any further information.

Sincerely,

Thomas H. Newton, Jr., PE  
Assistant Superintendent  
MIT Research Reactor
