This letter supplements the information provided in Reference 1 regarding the Authority's long-term pipe support inspection and evaluation program. The program plan for this effort is included as Attachment No. 1 to this letter.

The program plan describes the complete plan for investigating the current condition of pipe supports on safety-related piping and assuring that these supports comply with applicable installation criteria. The plan also describes: the scope of the investigation; a program to repair or restore discrepant pipe supports; and, a program to document both the investigation and any corrective actions necessary. The plan also includes a preliminary program schedule.

Very truly yours,
