1.0 INTRODUCTION

This report describes the Implementation of the Environmental Protection Plan (EPP) from the date of issuance of the operating licence, October 26, 1984, through December 31, 1984.

Provided herein are summaries and results of the environmental protection activities required by Subsection 4.2 of the EPP.

2.0 ENVIRONMENTAL PROTECTION ACTIVITIES

2.1 Aquatic Monitoring

The Environmental Protection Plan states that the NRC will rely on decisions made by the Commonwealth of Pennsylvania, under the authority of the Clean Water Act, for any requirements for aquatic monitoring. Industrial Waste NPDES Permit PA 0051926 dated September 19, 1984 provides the mechanisms for protecting water quality and indirectly aquatic biota.

In accordance with the requirements of Section 3 of the Permit monitoring results obtained during October, November and December 1984 were summarized for each month and reported on Discharge Monitoring Reports.

2.2 Terrestrial Monitoring

No terrestrial monitoring is required.

2.3 Maintenance of Transmission Line Corridors

Due to the time of year (late October through December) there was no transmission line maintenance required.

2.4 Noise Monitoring

No noise surveys were conducted during this reporting period. Surveys will be conducted in accordance with the EPP requirements and results will be reported in future annual reports.

2.5 EPP Noncompliances

There were no EPP noncompliances for this reporting period.

2.6 Changes In Station Design or Operation, Tests, or Experiments

There were no changes in the Limerick Generating Station design or operation, tests, and experiments during this reporting period which involved an unreviewed environmental question.

2.7 Nonroutine Reports Submitted

For this reporting period, no nonroutine reports in accordance with EPP Subsection 4.4.2 were submitted.

Docket No. 50-352 & 50-353

Dr. Thomas E. Murley
Regional Administrator
Office of Insp. & Enforcement OIE
US Nuclear Regulatory Comm.
631 Park Ave. Region I
King of Prussia, PA 19406

Dear Dr. Murley:

Pursuant to the requirements set forth in Appendix A of the Limerick Generating Station Operating License, Technical Specifications, Section 6.9.1.7., we are sending you a copy of the 1984 Regional Radiological Environmental Monitoring Program No. 1 by Teledyne Isotopes and Radiation Management Corporation.

The ten day period that this report covers represents the portion of 1984 after which Limerick achieved initial criticality. The Radiological Environmental Monitoring Program confirmed that the LGS environmental effects from radioactive releases are well below the LGS Technical Specifications and applicable regulatory limits.

Yours truly,

W. B. Willsey
Director
Environmental Affairs
