Attention: Mr. D. F. Kirsch, Acting Director
Division of Reactor Safety and Projects

Subject: Time Extension for Report - DER 85-03
A 50.55(e) Potentially Reportable Deficiency Relating To
The Three Inch Seismic Gap Criteria
File: 85-019-026; D.4.33.2

Reference: (A) Telephone conversation between P. Narbut and T. Bradish
on February 8, 1985
(B) ANPP-32093, dated March 7, 1985 (Interim Report)

Dear Sir:

The NRC was notified of a potentially reportable deficiency in Reference (A) and an Interim Report was transmitted by Reference (B). At that time it was estimated that a Final Report would be available by April 15, 1985.

As discussed at the March 21, 1985 meeting with the NRC in Walnut Creek, the scope of the DER has been expanded. An expanded investigation of the deficiency will be conducted to include the action items identified during those discussions.

Due to the additional investigation and evaluation required, it is now expected that this information will be finalized by May 15, 1985, at which time a complete report will be submitted.

There is no new information or change to the Interim Report at this time.

Very truly yours,

8505080022 850412
