Docket Nos. 50-327
50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS)
CHANGE 96-03, "CONDENSATE STORAGE TANK (CST)"

In accordance with 10 CFR 50.90, we are enclosing an amendment to Licenses DPR-77 and DPR-79 to change the TSs of SQN Units 1 and 2. The proposed change revises Specification 3.7.1.3, "Condensate Storage Tank," to include a new mode of applicability that reads: "Mode 4 when steam generator is relied upon for heat removal." In addition, other proposed changes to Specification 3.7.1.3 and a Bases change to Bases Sections 3/4.3.1 and 3/4.3.2, "Protective and Engineered Safety Features (ESF) Instrumentation," are included to provide improvements and establish requirements that are consistent with Westinghouse Standard Technical Specifications (NUREG-1431, Revision 1).

The proposed TS change is identified in Enclosure 1. The justification for the proposed TS change is provided in Enclosure 2. A proposed determination of no significant hazards consideration performed pursuant to 10 CFR 50.92 is provided in Enclosure 3. Enclosure 4 provides the retyped pages for the proposed TS change.

TVA requests a 45-day implementation period for this TS change following issuance.
