Washington, D.C. 20472

MAY 7 1985

55-322

MEMORANDUM FOR: Edward L. Jordan
Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Shoreham Nuclear Power Station Alert and Notification
System Review

This is in response to your memorandum of March 29, 1985, in which you requested that the Federal Emergency Management Agency (FEMA) review the Shoreham Nuclear Power Station alert and notification system (ANS) design submitted by the Long Island Lighting Company (LILCO). The Shoreham ANS will be reviewed in conjunction with the ongoing program for the evaluation for alert and notification systems at nuclear power plants as outlined in FEMA-43.

Tentatively, the Shoreham ANS technical review is scheduled for completion by Fall 1985, with a demonstration of the system and public telephone survey to follow shortly thereafter. However, the conduct of the survey is subject to Office of Management and Budget (OMB) reapproval of the next series of telephone surveys.

All current OMB-approved surveys were scheduled at other nuclear power sites prior to receipt of the Shoreham ANS report. Therefore, based on chronological receipt of this report, an OMB approval for FEMA to conduct the next series of telephone surveys is required before conducting one at Shoreham.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief Technological Hazards Division at 646-2861.
