U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555-0001

Subject: Individual Plant Examination of External Events (IPEEE) Submittal Extension  
Cooper Nuclear Station, NRC Docket No. 50-298, License No. DPR-46

Reference: Letter (No. NLS940126) to USNRC Document Control Desk from G R. Horn  
(NPPD), dated December 13, 1994, "Update to IPEEE and USI A-46 Completion  
Schedule"

Gentlemen:

The purpose of this letter is to inform the Nuclear Regulatory Commission (NRC) that the Nebraska Public Power District (District) is revising its commitment for submitting the Cooper Nuclear Station (CNS) Individual Plant Examination of External Events (IPEEE) Report from August 31, 1996 to October 30, 1996, as committed in the above reference.

The District has experienced delays in resolving comments on the final information needed to complete the IPEEE Report for CNS. Therefore, additional time is necessary in order to compile and review this report. However, the District will aggressively work towards completing the report as close to the August 1996 goal as possible. This issue has been discussed with the NRC Senior Project Manager for CNS.

Should you have any questions or require any additional information, please contact me.

Sincerely,

Philip D. Graham  
Site Manager
