Washington, D.C. 20555

Gentlemen:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request No. 234
Anticipatory Scram Signal Bypass Setpoint

GPU Nuclear Corporation submitted the subject amendment to the Nuclear Regulatory Commission on March 28, 1996. This proposed change request modifies statements in the Technical Specifications and the bases to correctly reflect the reference parameter for the anticipatory scram signal bypass. The amendment will properly align the Technical Specifications, the FSAR and the setpoint.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering reviewed the above amendment in accordance with the requirements of 10CFR50.91(b) and has no comments.

If you have any questions, please contact Rich Pinney at (609) 984-7558.

240073

Sincerely,

Kent Tosch, Manager
Bureau of Nuclear Engineering
