Re: Catawba Nuclear Station  
Docket No. 50-413  
McGuire Nuclear Station  
Docket Nos. 50-369 and 50-370  
Technical Specifications Amendment

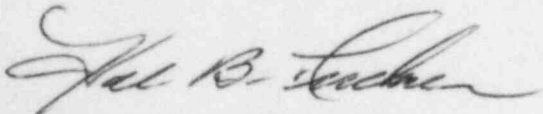

Dear Mr. Denton:

This letter contains proposed amendments to the Technical Specifications for Facility Operating License No. NPF-35 for Catawba Unit 1 and for Facility Operating Licenses NPF-9 and NPF-17 for McGuire Units 1 and 2 respectively. The attachment contains the proposed changes and a discussion of the justification and safety analyses. The analyses are included pursuant to 10 CFR 50.91 and it has been concluded that the proposed amendments do not involve significant hazards considerations. It is also requested that these changes be incorporated into the proposed Catawba Units 1 and 2 combined Technical Specifications which were transmitted by my letter of March 15, 1985.

This request involves one amendment request to Catawba's Technical Specifications and one for McGuire's Technical Specifications. Accordingly, pursuant to 10 CFR 170.21 a check for \$150.00 is enclosed.

Pursuant to 10 CFR 50.91 (b) (1) the appropriate South Carolina and North Carolina State Officials are being provided a copy of this amendment request.

Very truly yours,

Hal B. Tucker
