Gentlemen:

DOCKETS 50-266 AND 50-301  
GENERIC LETTER 88-20  
SCHEDULE FOR SUBMITTAL OF IPEEE  
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

By letter dated June 30, 1995, Wisconsin Electric Power Company submitted a summary report in response to Generic Letter 88-20, Supplement 4, "Individual Plant Examination of External Events for Severe Accident Vulnerabilities." Based on the NRC Staff's review, a request for additional information (RAI) was developed and transmitted to Wisconsin Electric by letter dated April 15, 1996, and received April 19, 1996. The letter requested Wisconsin Electric to either provide a response within 60 days of receipt of the letter or notify the NRC if we believed additional time would be required to provide an adequate response.

On May 28, 1996, Wisconsin Electric Power Company personnel participated in a conference call with Messrs. Allen Hansen and John Chen of the NRC to clarify the information requested in the RAI. In order to provide a complete response to the RAI, we requested an additional 60 days to respond to the staff's request. Messrs. Hansen and Chen confirmed the extension was acceptable.

We appreciated the opportunity to discuss our IPEEE submittal with the NRC Staff. Should you have any outstanding questions, please contact us.

Sincerely,

Bob Link  
Vice President  
Nuclear Power
