Mr. William J. Dircks  
Executive Director for Operations  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Dircks:

In accordance with the Federal Emergency Management Agency (FEMA) rule 44 CFR 350, the State of Minnesota submitted its State and associated local plans for radiological emergencies related to the Monticello Nuclear Power Plant to the Regional Director of FEMA Region V for FEMA review and approval. The Regional Director forwarded his evaluation of the Minnesota State and local plans to me on January 26, 1984, in accordance with section 350.11 of the rule. His submission included an evaluation of the exercises conducted on January 7, 1981, March 2, 1982, and February 23, 1983, and a report of the public meeting held on January 8, 1981, which explained the site-specific aspects of the State and local plans.

Based on an overall evaluation, I find and determine that the State and local plans and preparedness for the Monticello Nuclear Power Plant are adequate to protect the health and safety of the public in that there is reasonable assurance that the appropriate protective measures can be taken offsite in the event of a radiological emergency. The public alert and notification (A&N) system was approved by FEMA on April 25, 1985 in accordance with the joint Nuclear Regulatory Commission (NRC)/FEMA criteria in NUREG-0654/FEMA-REP-1, Rev. 1, Appendix 3 and FEMA-43, "Standard Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants".

Sincerely,

Samuel W. Speck  
Associate Director  
State and Local Programs  
and Support
