U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

Subject: Beaver Valley Power Station, Unit No. 1  
Docket No. 50-334, License No. DPR-66  
Proposed Operating License Change Request No. 198  
(TAC No. 84229)

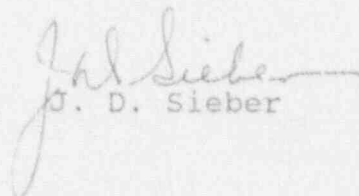

Enclosed are the following:

1. An application for amendment to the above license to incorporate a temporary license condition that would extend certain technical specification 18-month surveillance intervals to coincide with the ninth refueling outage.
2. Documents designated Attachment A, B, C and D which set forth, respectively, the change in the operating license, the safety analysis (including the no significant hazards evaluation), the typed replacement operating license pages, and extended technical specification surveillances.

This change has been reviewed by the Onsite Safety Committee and Offsite Review Committee and was determined to be safe based on the attached safety analysis.

The requested target date for approval of this proposed change is December 11, 1992.

Sincerely,

  
J. D. Sieber
