BRUNSWICK STEAM ELECTRIC PLANT UNITS 1 AND 2
DOCKET NOS. 50-325 AND 50-324
LICENSE NOS. DPR-71 AND DPR-62
SUPPLEMENTAL REF: TO A NOTICE OF VIOLATION 92-15-02

Gentlemen:

On June 19, 1992, the Nuclear Regulatory Commission issued a Notice of Violation as part of NRC Inspection Report 50-325-02-11 and 50-324/92-15. By letter dated August 3, 1992, Carolina Power & Light Company responded to the Notice of Violation.

The purpose of this letter is to document a change to the schedule of corrective actions outlined in response to Example 1 of Violation C (i.e., 325,324/92-15-02), Inadequate Procedural Controls Over Plant Systems.

As addressed in the response to Example 1 of Violation C the Brunswick Nuclear Project indicated that a revision to OMMM-003, Corrective Maintenance (Automated Maintenance Management System), was scheduled to be implemented by August 14, 1992. Subsequent to the OMMM-003 revision, three additional procedures were scheduled to be revised:

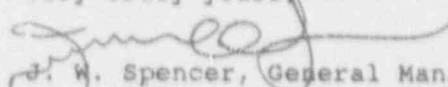

OMMM-002, Standards for Preparing and Maintaining Maintenance Procedures, scheduled for August 31, 1992.

OMMM-001, Maintenance: Conduct of Operations, scheduled for October 15, 1992.

OMMM-013, Maintenance Surveillance Test User's Guide, scheduled for December 31, 1992.

The revision to OMMM-003 was implemented on August 14, 1992; however, the schedule for the revision of OMMM-002 and OMMM-001 has been revised to December 31, 1992. The new schedule will allow for better coordination with other Maintenance Procedure revisions which are in progress. The schedule for OMMM-013 has not been revised and the date when CP&L will be in full compliance remains December 31, 1992.

Very truly yours,

J. W. Spencer, General Manager
Brunswick Nuclear Project
