SUBJECT: Arkansas Nuclear One - Units 1 & 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPF-6
Proposed Revision to the ANO
Industrial Security Plan

Gentlemen:

As part of the continuing review of the security effectiveness at Arkansas Nuclear One, Units 1 and 2 (ANO-1 & 2), Entergy Operations has identified changes to the ANO Industrial Security Plan (ISP). These changes will allow added flexibility to determine the security shift staffing requirements and compensatory measures based on plant activities and the status of the overall Security program. The proposed revisions to the ANO ISP and supporting documentation for this request are attached.

Entergy Operations has evaluated these changes in accordance with the requirements of 10CFR50.54(b). It was determined that these changes should be processed under the provisions of 10CFR50.90. Accordingly, Entergy Operations has evaluated the proposed changes using the criteria in 10CFR50.92(c) and determined that the said changes involve no significant hazards considerations. The bases for this determination is also attached. Entergy Operations requests that the effective date for this revision be upon NRC issuance of the amendment.

The attached material describes current and proposed security measures; therefore, Entergy Operations has determined that the attached documentation contains safeguards information as specified by 10CFR73.21. The attached documentation should therefore be handled appropriately.

Very truly yours,

[Signature]
