Staff Hosted Public Meeting with NuScale on Emergency Planning Zone Sizing Methodology Topical Report

On April 15, 2020, the U.S. Nuclear Regulatory Commission (NRC) staff hosted a public meeting in which NuScale Power, LLC (NuScale) outlined a proposed revision to their Emergency Planning Zone (EPZ) Sizing Methodology Topical Report (TR). Significant modifications have occurred since NuScale previous EPZ TR's submittal dated March 12, 2018 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18071A354), including a qualitative (instead of quantitative) defense-in-depth evaluation, and the external event screening criteria based on seismic probabilistic risk analysis. The meeting had active participation by over 60 participants and included several industry stakeholders (e.g., Tennessee Valley Authority, Nuclear Energy Institute, Kairos, U.S. Nuclear Industry Council, GEH, x-Energy, Southern Nuclear), as well as the public and Union of Concerned Scientists. The revised EPZ TR is expected to be submitted by the end of May 2020.

Staff Hosted Public Meeting on Emergency Response Organization Performance Indicator

On April 15, 2020, the Office of Nuclear Reactor Regulation (NRR) and the Office of Nuclear Security and Incidence Response staff hosted a public teleconference with representatives from the Nuclear Energy Institute, Entergy, NextEra, various licensee staff, and members of the public to discuss and finalize Frequently Asked Question (FAQ) 20-02, Emergency Preparedness (EP) – Emergency Response Organization Performance Indicator (ERO PI) (ADAMS Accession No. ML20107F675). The FAQ addresses the impact to the ERO PI of deferred EP drills and exercises due to the COVID-19 public health emergency.

NRC Launches Online Submission Portal for Operating Reactor Licensees

On April 19, 2020, the NRC staff launched an online submission portal for operating reactor licensees to use as an option for submitting COVID-19 related requests for exemptions from specific regulations in Title 10 of the *Code of Federal Regulations* (10 CFR) Part 26, "Fitness for Duty Programs" regarding work hour requirements. This portal can be accessed Licensees are able to accessed from the NRR COVID-19 public webpage (<https://www.nrc.gov/about-nrc/covid-19/reactors/>).

Staff Hosted Public Meeting on Status of Reactor Oversight Process Topics

On April 22, 2020, the NRC staff held a public meeting with the industry's Reactor Oversight Process (ROP) Task Force and members of the public to discuss the status of ROP topics. The agenda included discussions on NRC's inspection response to COVID-19 (ADAMS Accession Nos. ML20097E538 and ML20079E700), engineering inspection updates, significance determination process updates, NRC staff's response to Performance Indicator Frequently Asked Question 20-01 (ADAMS Accession No. ML20108E914), and ROP Enhancement Project transition to normal work management practices (ADAMS Accession Nos. ML19101A334 and

ML19252A231). The next ROP monthly public meeting between the NRC staff and the ROP Task Force is scheduled for May 20, 2020.

Staff Approved Licensing Requests for Regulatory Relief Related to the COVID-19 Public Health Emergency

The NRC staff has reviewed and approved several licensing requests seeking temporary flexibilities to maintain the safe and secure operation of the U.S. nuclear fleet during the pandemic. A summary of approved licensing actions provided during this reporting period are summarized below. A complete list of licensing actions approved by the NRC in response to the COVID-19 public health emergency is available on the NRC public Website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.
