Re: Renewal of NRC License No. 34-01869-02

Gentlemen,

We are enclosing our application for the renewal and amendment of NRC License No. 34-01869-02.

The renewal will cover the continued use of our existing Cobalt-60 teletherapy unit (AECL Theratron F) under the same conditions as described on our current license.

The amendments cover a change in the list of individual users, as well as an increase in the amount of Cobalt-60 we can possess. This latter is to enable us to acquire and use a second Cobalt-60 teletherapy unit (an AECL Theratron 780). All pertinent information is included in this renewal application.

If further information is needed, please do not hesitate to get in touch with us.

Sincerely,

Theodore J. Castele, M.D.
Director of Radiology
