

DEPARTMENT OF THE AIR FORCE

HEADQUARTERS AIR FORCE MEDICAL OPERATIONS AGENCY
BROOKS AIR FORCE BASE TEXAS

007 27

FROM: HQ AFMOA/SGPR
8901 15th St
Brooks AFB TX 78235-5217

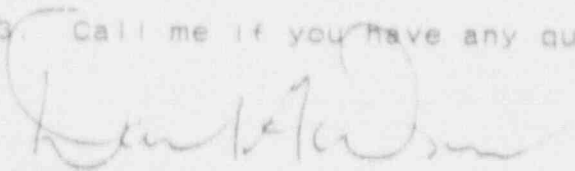

SUBJ: Reply to Notice of Violation (NOV), License No. 42-23539-01AF, NRC Inspection Report No. 030-28641/92-03 (Our Ltr, 5 Oct 1992)

TO: USNRC Region IV
ATTN: Ms. Linda M. McLean
Parkway Central Plaza Bldg
611 Ryan Plaza Drive Ste 400
Arlington TX 76011-4010

1. Reference your 21 Oct 92 telephone inquiry concerning medical permittee swipes. The attached correspondence and actions are provided to confirm my verbal response given 22 Oct 92 which advised that the April 1991 collection date referenced on swipe reports and in the permittee response was in error and these swipes were actually collected in June 1991. The one day difference in dates received on AF Form 495 and the reports result from transmission time between laboratory mail receipt and entry for processing.

2. I trust this will clear up the confusion over this issue generated in our earlier response to the NOV.

3. Call me if you have any questions.

DAVID G. WOOD, COLONEL, USAF, BSC
Chief, USAF Radioisotope Committee Secretariat
Office of the Surgeon General

22 Oct 92

SUBJ: AFSC Regional Hospital/SGPB Jun 92 letter, Leak Test
Requirement of permit 09-17214-1AFP(your inquiry 21 Oct
92

TO: AFMOA/SGPR

1. Leak tests are required for all permittees on a six-month cycle, and I task all permittees to perform leak tests via letter the month before the leak tests are due. The sample numbers are assigned for the year in December, and are provided the permittee in the December letter. However, while the sample numbers are provided in December, the AF form 495s are issued only for the leak test required in December. A second letter to initiate the July leak test is issued in June with the same numbers, but this letter provides the permittee with the AF form 495s for the July samples. Thus it is highly unlikely that the permittee would go to the trouble of performing an April leak test, retaining the sample until the AF form 495s arrived and then submit them.

2. The leak tests taken in response to the 11 Jun letter have a date collected of 24 Apr 91. The technician who performed the test has since retired from the military and is not available to comment on the circumstances of the test. The AF form 495 is an envelope into which we insert the actual sample and has no carbon copy capacity. We did not and do not retain a photocopy of the AF form 495, although this could easily have been done. The date on the 495 was reviewed by AL/OEBS (Maj McKinnon) this morning and the collection date recorded on the form for all of the samples is 24 Jun 91, not 24 Apr 91 as previously reported. Corrected leak test reports have been issued and copies are attached.

3. Please feel free to call me with any questions at (904) 882-5787.

M G Tiedemann

Brooks AFB TX 78235-5114

22 OCT 1992

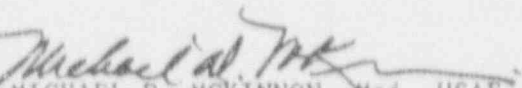

SUBJ: Eglin AFB Swipe Samples

TO: AFMOA/SGPR (Col Wood)

1. Per your request, attached are the corrected sample results for the swipe samples submitted by Eglin AFB FL during June 1991. Also attached are copies of the original AF Form 495s.

2. We obviously made an error when keying in the date received information, and entered 910424 (24 Apr 91) instead of 910624 (24 Jun 91). We regret the error and I have counseled everyone involved to be more diligent in ensuring correct data entry. Our sample results are subjected to at least three levels of review, and this type of data entry mistake is normally detected before results are mailed. We receive and analyze approximately 8,000 swipe samples per year, and negative feedback from our customers is almost nonexistent (15 out of 8,000 represents < 0.2% error rate).

3. If you have any questions concerning this matter, contact me or MSgt Boyd at 4-2061.

MICHAEL D. MCKINNON, Maj, USAF, BSC
Chief, Radioanalytical Branch
