Gentlemen:

Subject: Oyster Creek Nuclear Generating Station (OCNGS)
Docket No. 50-219
Facility Operating License No. DPR-16
Oyster Creek Drywell Containment -
Drywell Stability Analysis (Without Sand), Revision 2.

Reference: GPI.N Letter C321-92-2008/5000-92-2093 dated January 16, 1992 -
Oyster Creek Drywell Stability Analyses (With and Without Sand),
GE Reports Index No. 9-2 and 9-4, Revision 1.

The referenced letter provided Revision 1 of GPU Nuclear's ASME Section VIII evaluation of the Oyster Creek Drywell for the without sand stability analysis, GE Report Index 9-4. This letter provides you with Revision 2 to this evaluation.

This revision incorporates changes resulting from an internal review which identified the need for mesh refinement in the finite element model used in the stability analysis. The revised calculated capacity remains in compliance with all required ASME Code provisions.

If you have any questions or comments on this submittal, please contact Mr. Michael Laggart, Manager, Corporate Nuclear Licensing at (201) 316-7968.

Very truly yours,

J. C. DeVine, Jr.
Vice President and Director
