License No. 20-15614-01
Docket No. 030-09458
Control No. 03281

Milton Medical Center
ATTN: Kenneth Richmond
Hospital Administrator
92 Highland Street
Milton, Massachusetts 02186

Gentlemen:

This is in reference to your request in letter dated November 28, 1984 to amend License No. 20-15614-01. In order to continue our review, we need the following additional information:

- A. Item 4. of Form NRC 313M-Supplement A submitted for Dr. William E. Cobb must show a breakdown by dates, locations and number of hours of training in each subject. Be certain to arrange this information such that we can trace the individual hours of training to the institution where those hours were obtained. Hours of training should be further broken down into lecture/laboratory courses and supervised laboratory experience. Each hour of training should be listed under only one category (i.e., the most applicable category).
- B. The preceptor statements submitted do not indicate the number of cases involving the treatment of thyroid carcinoma with iodine-131 in which Dr. William E. Cobb personally participated. As specified in Subitem 4.b(1) of Appendix A of Regulatory Guide 10.8 (enclosed), you need to submit documentation of personal participation by Dr. Cobb in the treatment of ten patients with hyperthyroidism and/or cardiac dysfunction, and active participation in the treatment of three patients with thyroid carcinoma in order for Dr. Cobb to be authorized to use iodine-131 for the treatment of hyperthyroidism and thyroid carcinoma.
- C. Please indicate in Item 3 of NRC Form 313M-Supplement B the dates and total number of hours in clinical radioisotope training that Dr. Cobb has received.
