Docket No. 50-320

Dr. Edward Zebroski
Electric Power Research Institute
3412 Hillview Avenue
P. O. Box 10412
Palo Alto, CA 94303

Dear Ed:

Representatives from your office picked up a copy of the transcript of the interviews which were done in connection with the Office of Inspection and Enforcement investigation of the TMI accident. This material has also been placed in the public document room. Additionally, the material referenced in NUREG-0600 is expected to be available in the public document room by September 7, 1979. This material is so voluminous that it is not really practical for copies to be provided.

I am sorry that it took so long to respond to your request.

Sincerely,

(S)
Victor Stello, Jr.
Director
Office of Inspection
and Enforcement
