AFFIDAVIT OF AARON J. LEVINE

I, Aaron J. Levine, being duly sworn, depose and state as follows:

1. My name is Aaron J. Levine. I am the manager of Project Licensing Unit-1 for General Electric Company's Nuclear Energy Products Division. In this position, I have been involved in the AEC review of the General Electric emergency core cooling system (ECCS) evaluation models, on development of the schedules for completing calculation and in coordination with the operators of plants subject to new ECCS evaluation.
2. General Electric has been requested by the operators of the following plants to provide emergency core cooling system calculations for filing on August 5, 1974, pursuant to 10 CFR § 50.46:

	<u>Docket No.</u>
Vermont Yankee	50-271
Brunswick-2	50-325
Millstone	50-245
Dresden-2 & -3	50-237 & 50-249
Quad Cities-1 & -2	50-254 & 50-265
Monticello	50-263
Oyster Creek	50-219
Nine Mile Point	50-220
Pilgrim	50-293
TVA-1, -2 & -3	50-259, 50-260 & 50-296
Peach Bottom-2 & -3	50-277 & 50-278
Cooper	50-298
Duane Arnold	50-331
Fitzpatrick	50-333
Hatch-1	50-321

3. A previous affidavit attesting to the schedule for completion of these calculations was prepared and signed by me on June 17, 1974. This affidavit was referenced by several utilities in requests filed pursuant to 10 CFR 50.46(a)(2)(iii) and/or (vi).
4. The calculations for these 20 plants were completed between July 15 and July 24, 1974. The results of the calculations were promptly compiled

Affidavit of Aaron J. Levine, Continued

and distributed, as they were completed, for review and use by the plant operators in their filings. To the best of our knowledge, these calculations were performed in accordance with the requirements of 10 CFR Part 50 Appendix K. However, because the calculations have not yet received detailed review by plant operators, such a review has the potential to result in slight modifications on the basis of specific plant factors.

Aaron J. Levine

Subscribed and sworn to before me this 25th day of July, 1974.

Notary Public
