D. J. Skovholt, Assistant Director for Operating Reactors, L

RESPONSE TO TECHNICAL ASSISTANCE REQUEST - MONTICELLO NUCLEAR GENERATING PLANT, REVIEW OF CHANGE REQUEST DATED NOVEMBER 20, 1972

Plant Name: Monticello Nuclear Generating Plant
Licensing Stage: FTL
Docket No.: 50-263
Branch & Project Manager
Requesting Assistance: L:ORB-2, J. J. Shea
Technical Review Branch Involved: L:OSB
Requested Completion Date: ASAP
Description of Review: Proposed Administrative Section of Technical Specifications
Review Status: Complete

Work has been completed on the technical assistance request identified in the block above. Our memorandum to you, on December 18, 1972, recommended changes to the proposed Technical Specifications. Subsequent to that time the licensee requested reconsideration of some changes. We have been able to comply with some of his requests, and still maintain language in the license that is acceptable by our standards at the present time. We trust that this now terminates negotiations, and we attach herewith a transmittal letter to the licensee that specifies the new Technical Specifications.

Original Signed by
Donald F. Knuth

D. F. Knuth, Assistant Director
for Reactor Safety
Directorate of Licensing
