Attn: Frank Costello

Re: Response to our Date of Violation
Docket # 030-14914, License # 37-18356-01

Dear Mr. Costello:

Regarding the above mentioned Violation we submit the following:

On August 8, 1992 we filed an amendment to our license in which we have appointed an RSO. Also included are the individuals who have attended and successfully completed the Troxler training course.

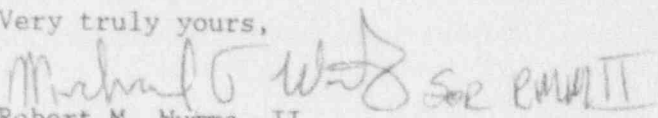

All three of our portable nuclear gauges have been inventoried and are now stored at 5100 Paxton St., Harrisburg, PA.

Pertaining to the broken cases, we have replaced our cases with new certified containers.

Along with the above corrective actions, all three gauges have locks to hold source rod in a safe position.

The new RSO has been helped immensely by the personnel of the NRC. If a problem arises in the future he will not hesitate to contact the NRC. At this time we are in full compliance with all regulations pertaining to our gauges.

Very truly yours,

Robert M. Mumma, II
President
