SAMPLE LETTER

(139)

I like this letter so much; I decided it says what I want -

Here is a sample letter which could be sent to the NRC. It should be shortened, expanded, or revised as desired. For the sake of variety, please do not use this exact text.

*Please respond.
Thanks!*

Dear Chairman Palladino:

I am writing to express my strong support for your proposal to convert U.S. research reactors from highly enriched uranium (HEU) fuel to low enriched uranium (LEU) fuel.

HEU, which can be used in an atomic weapon, poses an unnecessary threat to national and international security. Conversion to LEU is the most effective and sensible solution.

I urge the Commission to adopt the conversion requirement rule, and to implement it as soon as possible.

Sincerely, etc.
