10 CFR 35.615(d)(3) requires that the permanent radiation monitor installed in each teletherapy room be checked with a dedicated check source for proper operation each day before the teletherapy unit is used for treatment of patients.

Contrary to the above, on at least one day that the licensee used the teletherapy unit for treatment of patients, the permanent radiation monitor in the teletherapy room was not checked with a dedicated check source for proper operation before the teletherapy unit was used for treatment.
