EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

01 2 During annual preventive maintenance of ES valves, the HPI suction
01 3 valves from the borated water storage tank for Oconee 2 were inadvertently
01 4 rendered inoperable. Only one valve was out of service at a time, so the
01 5 BWST was always available to supply the HPI pumps if required. In addition,
01 6 the letdown storage tank was available as a source of water. Therefore, the
01 7 incident is considered to be of no significance with respect to safe operation,
01 8 and the health and safety of the public were not affected.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

01 9 The limit switches for the equivalent Oconee 1 valves were to have been
01 10 cleaned, but the limit switch assemblies for the nearby Oconee 2 valves were
01 11 inadvertently removed and cleaned. The valves were tested to verify oper-
01 12 ability, and the responsible personnel have been counselled and disciplined.
01 13

01 14 Procedures will be revised to include placing tags on components whose elec-
01 15 trical breakers have been tagged out.
