Community Hospitals of Indianapolis
Regional Cancer Center/East Pavilion
ATTN: Mr. Randy Wright
Vice President of Operations
1500 North Ritter Avenue
Indianapolis, Indiana 46219

License No. 13-06009-01
Docket No. 030-01625

Dear Mr. Wright:

This refers to the special safety inspection conducted by Ms. T. L. Simmons of this office on June 25 through November 4, 1992, of activities authorized by NRC Byproduct Material License No. 13-06009-01, and to the discussion of our findings with Dr. Arve Gillette at the conclusion of the inspection.

The inspection was conducted in response to concerns received by this office regarding an alleged unreported therapeutic misadministration. The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations and interviews with personnel.

After considerable review of the issue discussed in the enclosed report, we have concluded that the events of July 3 and July 19, 1991 do not constitute a misadministration as defined in 10 CFR 35.2. However, we are recommending that both this incident and the one brought to our attention in your letter dated September 9, 1992, be considered as recordable events. Records of each of these events should be maintained in accordance with 10 CFR 35.5. Further, it appears that your staff has taken adequate steps to reduce the probability of future occurrences of this type and we have no further questions regarding either of these matters.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any question you have concerning this inspection.

Sincerely,

John A. Grobe, Chief
Nuclear Materials Safety Branch
