Brian K. Grimes
NRC Special Steering Committee
Sir:

I have been very actively commenting and contacting the NRC on Emergency Planning and other issues. I am a full intervenor at EMI#1 Stop Restart Hearings.50-289.

I have not had any word on Emergency Planning at Limerick or the work of your steering Committee. I am wondering if this is another attempt to keep needed information out of the hands of the public involved.

I just had my Congressman and Senators involved with the problem of NRC charging for all and any information. They did a fine job. Senator Hart made some pointed comments about the change in information charges to Chairman Hendrie.

I don't like to run to my Congressman everytime the NRC tries to hold back information.

I shall await your answer to this letter before initiating any action .. I hope that you will see fit to send me enough information on your Committee's activities.

- A. Repots or Nuregs issued.
- B. Minutes of meetings.
- C. Committee Scope and mandate.
- D. Any other pertinent information.
